

## ROCK CENTER CAFÉ

*Rockefeller Center*

*New York City, New York*

*Client: Restaurant Associates*

Patrons of Rock Center Café find themselves in a most fortuitous position: enjoying an elegant dining experience with an unmatched view of the world-famous Rockefeller Center skating rink. Located on the north side of the rink, this 5,600-square-foot, 180-seat restaurant has an airy, comfortable style reminiscent of the cafes and dining terraces of Lake Como. Italian influences are also present on the menu, which is casual and contemporary, like the Café itself.

A fiery destination in its own right, the Café offers a magnificent view of Paul Manship's highly recognizable bronze gilded statue of Prometheus. In warmer months, the skating rink is transformed into the new Summer Garden which was also designed by Elkus Manfredi Architects.
